

ANSHUMAN SINGH CHOUHAN

Data Analyst / Data Engineer

Jaipur, India | +91 8690104399 | anshuman71134@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Data professional who ships end-to-end work — ingestion, cleaning, modeling, and dashboards non-technical stakeholders can open and trust. Google & Microsoft certified in data analytics and Power BI, with hands-on experience across SQL/PostgreSQL, Python, Power BI, and automated ETL pipelines. Projects span both analytics (cleaning, modeling, dashboarding) and engineering (pipelines, automation, deployment). Seeking an entry-level Data Analyst or Data Engineer role.

TECHNICAL SKILLS

- **Languages & Querying:** Python, SQL, DAX, Pandas, NumPy
- **Data Engineering:** PostgreSQL, DuckDB, Apache Airflow, Docker, Prefect, ETL Pipelines, Data Quality Checks
- **Analytics & Machine Learning:** Power BI, RFM Segmentation, XGBoost, Random Forest, FinBERT / NLP, Scikit-learn
- **Deployment & Tools:** Render, Git/GitHub, HuggingFace, REST APIs, Dimensional Modeling, A/B Testing, Statistical Analysis

PROJECTS

Retail Analytics & Customer Segmentation — Python, PostgreSQL, SQL, RFM Segmentation, Power BI, DAX 2026

- Built an end-to-end e-commerce analytics pipeline on the UCI Online Retail II dataset (1M+ transactions); cleaned and validated data in Python with documented data-quality decisions.
- Loaded cleaned data into PostgreSQL with 5 analytical views and ran RFM segmentation to split 5,861 customers into 8 behavioral segments.
- Shipped a 5-page Power BI dashboard with custom DAX measures covering revenue trends, geography, product performance, and customer behavior.

IPL Analytics Platform (2008–2026) — Python, XGBoost, Random Forest, Feature Engineering, Render 2026

- Engineered an end-to-end analytics platform spanning all 19 IPL seasons with an automated Cricsheet ingestion pipeline that keeps the dataset current through every completed season.
- Engineered 29 cricket-intelligent features and trained XGBoost / Random Forest models for win-probability prediction and auction-value estimation.
- Deployed and continuously updated both models on Render, exposing a live, self-refreshing analytics app.

Stock Sentiment Engine — FinBERT/NLP, Prefect, DuckDB, NSE Market Data 2026

- Built an end-to-end pipeline that scores Indian financial news with FinBERT and tests whether sentiment predicts next-day NSE stock movement.
- Orchestrated daily automated news ingestion with Prefect and ran lag-correlation analysis powered by DuckDB.
- Designed the system lean by default — zero Docker containers and zero paid cloud infrastructure.

CERTIFICATIONS

- **Google Data Analytics Professional Certificate** — Google / Coursera, Issued May 2026 (ID: 06Y002MRVVP2) | [Credential](#)
- **Microsoft Power BI Data Analyst Professional Certificate** — Microsoft / Coursera, Issued July 2026 | [Credential](#)
- **IBM AI / ML Specialization** — IBM / JECRC University, Issued July 2025 | [Credential](#)

EDUCATION

Master of Computer Applications in AI and Data Science 2025-2027
Manipal University

Bachelor of Computer Applications - AI/ML specialization (IBM Collaboration), CGPA 8.07 2022-2025
JECRC University
